

QuickApp Online Applications

Due Diligence Made Easy

QuickApp Online Applications are made simple to alleviate cutting and pasting, duplicate order entries, and processing incomplete applications. Save time and allow interested, qualified applicants to submit their applications online from any device, at any time. The process is fast and results are real time. Automated email notifications are sent directly to you when a report has been completed and the automated service collects the personal identifiers directly from the applicant in a secure data encrypted bank-grade standard.

The QuickApp Online Application is also brandable allowing a customized cohesive appearance to your applicant. Brand it with your company logo, colors, applicant messages, and a proprietary domain. You may attach any documents directly to the application forms and have the option to print electronic copies of the submitted applications, keeping you compliant and easily managing your applicant's on boarding documents.
